

How You Can Help

- Ensure that your child's emergency contact information is accurate and current through the SIS Parent Portal of the District website.
- Provide updated contact information to the school office as soon as possible.
- Sign up for Blackboard Connect at <https://camphillisd.bbportal.com/>
- If your child has any medical conditions, allergies or requires medications please speak with the school nurse. This information may be critical in an emergency.

Planning + Preparedness = Success

While it is unsettling to think about emergencies happening to our children, frequent review and practice of emergency procedures at home and at school, will help everyone to be prepared.

Throughout the school year, students will be trained in emergency procedures and will be taught how to react, where to assemble and what to expect in an emergency situation.

Formulate your own emergency plans and teach your child(ren) what to do in case of emergencies at home. Provide instructions for what to do and who to go to if you are not available in an emergency.

School Safety Terms

Evacuation: Certain emergencies will require students to exit the school building. Off-site evacuations may be conducted when it is not safe to remain on campus. If an evacuation occurs or one is in progress, please wait for instructions on where and how to be reunited with your child.

Lockdown: A lockdown may take place if an actual or potential internal threat is identified at or near the school. All school doors will be locked and access to the building and classrooms will be controlled. **NO ONE will be permitted to enter or leave the school until the situation is resolved.**

Restricted Movement: Occasionally student, staff and visitor movement may be limited in a school. This usually involves a pre-planned event or a medical emergency. Students will not be permitted to move freely during these events, but no immediate danger exists.

Severe Weather: In the event of a severe thunderstorm or tornado warning where danger to students is imminent, students will be moved to safer locations within the school to maximize their safety from high winds and potential building damage.

Shelter in Place: Certain emergencies, most notably hazardous materials releases near the school, may require students and staff to take refuge in the school for protection. **NO ONE will be permitted to enter or leave the school until the situation is resolved.**

Be Prepared for a School Emergency

While schools statistically remain one of the safest places in our country, both natural and human-caused events require us to prepare for school-based emergencies.
